

## REMARKS/ARGUMENTS

After entry of this paper, claims 1-24, 30-35, and 37 are pending. Claims 25-29 and 36 are canceled in an effort to reduce the number of claims for this filing. The remaining claims are amended to remove multiple dependent claim language, to combine claims where possible, and to ensure that the claims conform to USPTO rules and regulations. Applicants note that in an effort to avoid confusion, any underlining that was present in the paragraphs prior to amendment was removed. However, bolded print was substituted to identify the previously underlined subject matter. New claim 37 is added to recite another embodiment of the invention and substantially parallels the subject matter of original and canceled claim 28. No new matter is added by these amendments and new claim. Applicants thereby request entry of the claim cancellations and amendments prior to calculating the filing fees for this application.

By the filing of this paper, Applicants have also properly inserted a Cross-Reference to Related Applications and the Abstract on a separate sheet as new page 53. No new matter is added by these changes. The priority information for this application, including the foreign priority information, is also reflected on the Application Data Sheet filed herewith.

The Director is hereby authorized to charge any deficiency in any fees due with the filing of this paper or credit any overpayment in any fees to our Deposit Account Number 08-3040.

Respectfully submitted,

HOWSON AND HOWSON  
Attorneys for Applicants
